Hits are randomised among a target group, except for player characters, who may shoot at any figure they wish in clear sight.

Figures eligible to shoot

All commanded troops may fire if loaded etc (see above) others fire so;

Stationary troops may shoot at the following ratios;

Poor troops: 1 per 5 figures may shoot per turn.

Fair troops: 1 per 4 figures may shoot per turn.

Good troops: 1 per 3 figures may shoot per turn.

Uncommanded troops only shoot at the nearest enemy they can hit.

Visibility:

Figures in terrain are seen at D6 x 10cms range if within 10cms of the edge, or if they fire, or are in plain sight.

Visibility is 20 cms within woods.

Risk Factors:

RF's (Risk Factors) are added as indicated below; Note that uncommanded units will always shoot only at the nearest enemy to them (Measured from the nearest figure)-

-1: Good troops or Officer.

: Unit entirely in cover.

: Poor unit in range of any enemy unit in sight.

(2) What Morale effect the situation has on them.

The effect is immediate and simultaneous for all uncommanded units.

Note that Player Characters and commanded troops are shot at / attacked using the same system, but ignore shooting and movement instructions written in *Italics*.

P.C.s and Commanded units fire and move before other figures dice for their actions.
